ABOUT RS FITNESS

We boast a team headed up by managers with an Emirates market presence now in its 33rd year. We are headquartered in the Emirates and have invested for the future with multiple locations up and down the country.

Our business is the Supply, Install and After Sales Service of World Class Fitness Equipment.

We count all the Ruling Families of the Emirates, the Armed Forces, and the Police Departments, the Ministries, the Sports Clubs and the hospitality industry amongst our clients. Our clients includes:

- > Hilton Hotels
- > Aviation Club, Dubai
- > Jebel Ali Hotel and Ocean View, JBR Dubai
- > Dubai World Trade Centre
- > Fitness First Clubs
- > Gold's Gyms
- > Crowne Plaza Hotel, Dubai and Abu Dhabi
- > Intercontinental Hotel, Abu Dhabi
- > Radisson Blu Hotel, Abu Dhabi
- > Petroleum Institute
- > Abu Dhabi Company for Onshore Oil Operations (ADCO)
- > Al Dhafra Air Base – US Air Force
- > Armed Forces Officers Club
- > Zayed Military City
- > Abu Dhabi Food Control Authority

Even the best of the greatest products ever made need after sales service. We have a 12 strong Fitness Equipment Trained Service Team split between the metropolitan areas of Dubai and Abu Dhabi to serve our clients.

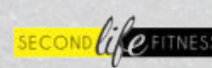

If you are in the market for fitness equipment, then give us a try.

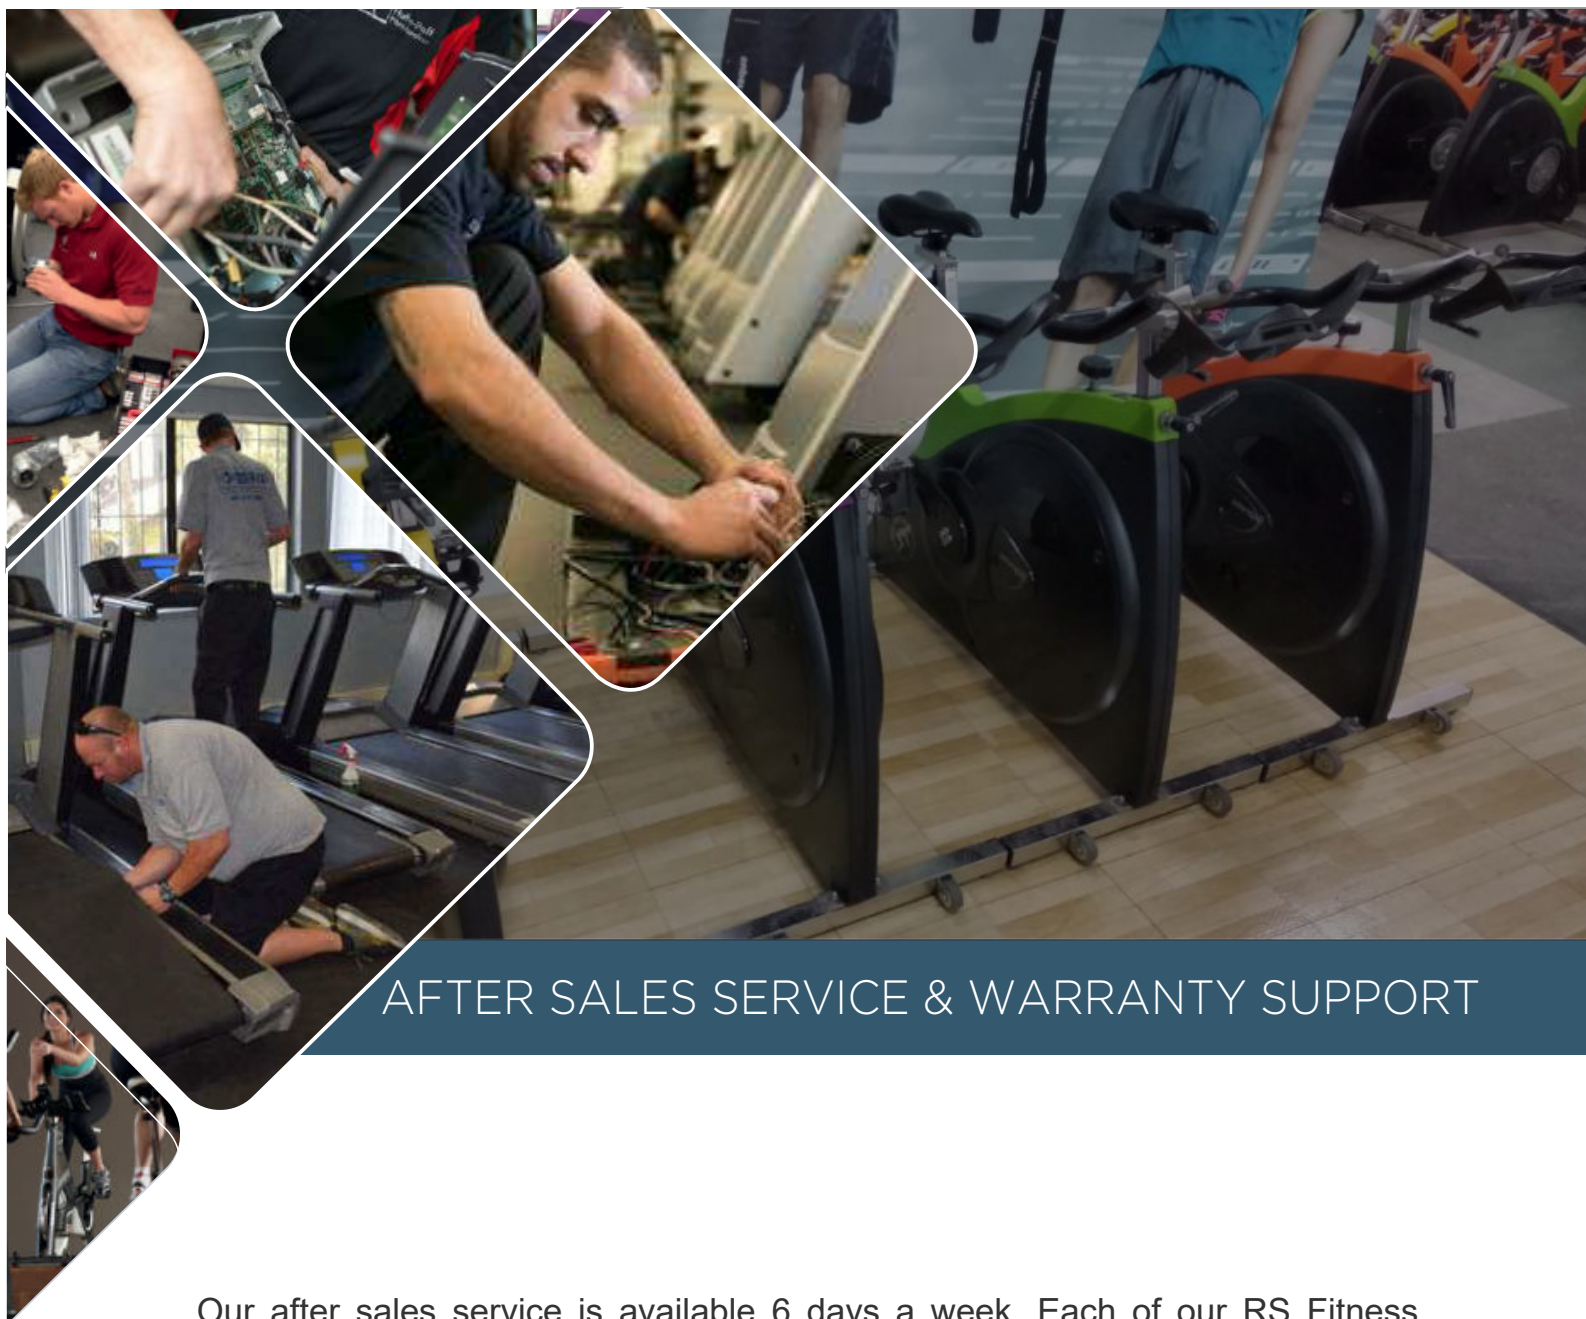

Note:

RS Fitness are an RS Leisure Group Company

All export business i.e. outside of U.A.E. is invoiced through our sister group company Recorp Middle East FZE who are headquartered in the Jebel Ali Free Trade Zone & are therefore exempt from Dubai customs & U.A.E VAT. www.recorp.ae

AFTER SALES SERVICE & WARRANTY SUPPORT

Our after sales service is available 6 days a week. Each of our RS Fitness engineers are fully trained on all RS Fitness products enabling them to achieve an outstanding first time fix rate.

Email: service@rsfitness.ae

In the unlikely event that your fitness equipment develops a fault, then we offer custom-made maintenance packages to give you complete peace of mind.

We offer different AMC plans to our customers which covers every aspect of equipment maintenance

SILVER QUARTERLY	BRONZE SEMI-ANNUAL (2 Visits)
GOLD MONTHLY	PAY AS YOU GO

CV Machines Maintenance Statement of Works

- Perform operation & functional test to verify all features are performing properly.
- Verify unit sits level on floor if necessary adjust the leveling feet.
- Turn off power switch/circuit breaker and unplug the power cord from the wall outlet.
- Inspect the power cord, make sure it is not damaged or underneath the treadmill. Verify the cord clamp is securely installed.
- Vacuum under the equipment & clean the floor underneath
- Verify the stop clip is in place and functional.
- Clean the treadmill's frame using a cloth dampened with an approved cleaning solution. Use a soft nylon scrub brush or a towel to clean the running belt.
- Use a dry towel to clean the running belt and deck.
- Verify the safety lanyard is in place and functional.
- Clean the electronic console surface with a damp lint free cloth and dry completely.
- Clean touch screen console with a diluted solution of one part 91% Isopropyl Alcohol to one part water on a damp lint free cloth and dry completely.
- Visually inspect the running deck and belt, make sure that the bed or belt is in good condition. Replace if necessary.
- Inspect visible welds, frame and wire connections.
- Clean drive belt and pulley with a small wire brush.
- Inspect running belt and deck.
- Check the tension, tracking and alignment of the running belt. Re-tension or adjust if necessary.
- Check the tension of the drive belt, adjust if necessary.
- Verify the wheels run smoothly on the elliptical ramp.
- Verify elliptical torque setting on crank arm and pillow blocks.
- Visually inspect the step-up and drive belts for cracks, fraying, or excessive wear.
- Verify the pedals move smoothly in the vertical and horizontal axis.
- Verify stationary bike seat moves smoothly through the entire adjustment range and the position latch works correctly.
- Remove hood & covers and vacuum the compartment and motor controller fan.
- Perform the software diagnostics, check LED function and record the odometer reading.
- Conduct Functionality test both the wireless and hand held heart rate.
- Check the drive motor brushes, if applicable.
- Inspect & lubricate lift motor screw, if necessary
- Check speed sensor function.
- Visually examine all wiring and connectors.
- Perform the software diagnostics, check LED function, and record the odometer reading.

Strength Machines Maintenance Statement of Works

- Operation & function verification.
- Verify unit sits level on floor.
- Vacuum underneath equipment.
- Clean all surfaces.
- Lube guide rods, bushings, rod ends, linear bearings, shafts and pop pins.
- Inspect visible welds, frame, and cable connections.
- Inspect cables and cable ends replacing upon any sign of wear.
- Check for kinks, frayed wires or deterioration of the cable coating.
- Look for signs of wear particularly at crimped ends of the cable and near pulleys.
- Verify proper tension on all cables.
- Inspect upholstery and pads for excessive wear and re-upholster if necessary
- Wipe down clean the frame unit.
- Verify the weight stack pin tether is attached and not missing.
- Inspect all weight pins to ensure they are secure and aligned with the weight stack.
- Verify the instruction placard is attached and intact.
- Check the machine motion to ensure smooth through full range of travel.
- Verify the adjustments of seats fully functional and lube.

Indoor Cycle Maintenance Statement of Works

- Inspect, adjust, tune and lubricate all bikes
- Check entire bikes for rust, loose or worn parts
- Tighten crank arm fixing bolts & bottom bracket
- Remove excess gunk from brake assembly
- Inspect the brake pad for wear & tear
- Check saddle levelness & clamp bolt
- Check resistance unit if secured, centered and correctly adjusted
- Check the poly v Bbelt or chain properly tensioned
- Check pedals, toe straps and adjustment handles for wear & tear

reddot design award winner

Escalate 550Ce2 Stairclimber
THE ULTIMATE ANSWER. FOR EVERYBODY

THE SLIDE SELECT SYSTEM

The most talked about feature of the Club Line, the Slide Select System, eliminates guide rods and selector pins, requires less maintenance, and has a smoother function than a traditional selectorized machine. It also features a built-in smaller weight adjustment in five pound increments on the two hundred and three hundred pound systems. Finally, with no clanging weights, the Slide Select System is much quieter than the traditional weight stack resistance system.

SLIDE SYSTEM EFFECT

An easy-to-use weight selection system comprised of a solitary weight with varying leverage

MULTIPLE GRIP OPTIONS

Patented Flip n Grip® technology provides 4 lat pull grip options, including rock grips

COMPACT DESIGN

16% smaller footprint allowing more space for more equipment and 19% lower profile allowing better line of sight

QUIET OPERATION

Weight-on-weight contact is eliminated with Slide Select System

OUR NEW CLUB LINE FEATURES LOWER PROFILES, A SMALLER TOTAL FOOTPRINT & VERY SMOOTH, QUIET FUNCTIONS FOR A BETTER USER & OWNER EXPERIENCE.

CL-3501 SHOULDER PRESS

CL-3403 LEG PRESS

CL-3402 LEG CURL

CL-3401 LEG EXTENSION

CL-3301 CHEST PRESS

CL-3201 LAT PULLDOWN

CL-3103 TRICEPS PRESS

CL-3102 PREACHER CURL

WHAT'S UNIQUE ABOUT THE CLUB LINE?

- ▶ 16% smaller footprint
- ▶ 19% lower profile
- ▶ Quiet operation
- ▶ No loose pins or lanyards
- ▶ Smooth feeling movements
- ▶ Sleek design
- ▶ More increments
- ▶ Simple weight selection

POWER A MOVEMENT // CHANGE THE WORLD ONE WORKOUT AT A TIME // POWER A MOVEMENT

AWE-INSPIRING DESIGN, ONE FULL CARDIO LINE, TWO VERSIONS WHERE FORM DOESN'T, JUST MEET FUNCTION, IT EMBRACES IT IN OUR MOST STUNNING AND INVITING DESIGN.

The Future Looks Green

Sustainable living is more than just shutting off lights in empty rooms and recycling plastic – it's leaving the planet a little better than you found it. With SportsArt ECO-POWR™, fitness facilities can transform into power plants that offset their building's electrical costs and earn points towards LEED certification, government incentives, and more.

Unplug Your Workout

The ECO-NATURAL™ line boasts energy-saving fitness equipment that offers individuals a sustainable and intuitive workout experience embodied within a sleek and modern design.

SportsArt's Strength lines consist of two selectorized machine categories: Status and Performance. The line also includes dual-function units, plate loaded units, and free weights and benches. Our premium Status line equipment is designed to increase training balance and provide biomechanically accurate exercise, while our ergonomic Performance and Dual Function lines offer supreme performance at a competitive price. SportsArt's plate loaded and free weight/bench products utilize proper biomechanics and durable construction to provide a robust and stable workout.

BODY BIKE OCEANIX - A WORLD-FIRST IN THE BATTLE AGAINST PLASTIC POLLUTION

BODY BIKE SMART®+ is leading-edge technology combined with functional, Scandinavian design. It features the revolutionary SMART Charge: Power up your phone with your pedal strokes – the harder you ride, the more power you produce! No batteries - the bike is self-generating.

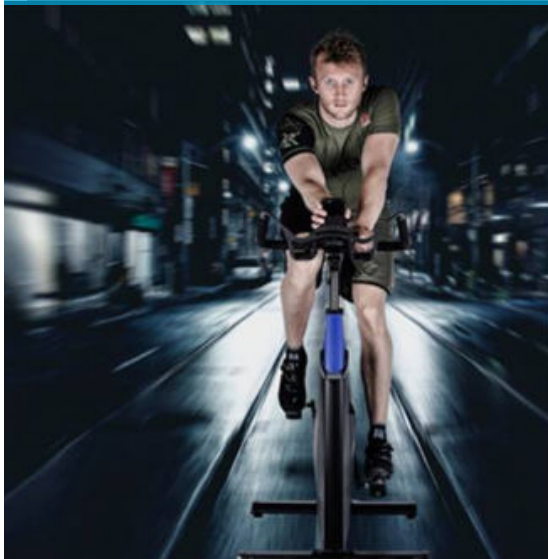

The new BODY BIKE® Indoor Cycling App collects, visualizes and stores your performance data: Power, HR, cadence, calories, distance, speed, MAP and FTP - current, maximum and average values. Review your performance and track your progress.

Customize your screen - 4 different skins to choose from. SMART®+ transmits both Bluetooth® and ANT+ signal and connects to virtually all training ANT+ signal and connects to virtually all training apps and training systems.

Riders can also charge their device through the power generated as they cycle.

BODY BIKE: Blazing a trail of innovation
BODY BIKE® Wins Danish Industry INITIATIVE AWARD

TRAIN SMART WITH THE APP

Our app is developed for BODY BIKE SMART®+. It enables you to display your training data on your smartphone as you work out and save it in the app's workout history.

GET IT ON Google Play

Available on the iPhone App Store

wattbike

Obsessed with Performance...

Obsessed with perfectly replicating the sensation of riding on the road. Obsessed with generating the world's most accurate power technique and performance data. Obsessed with creating the ultimate indoor cycling experience.

CHOSEN BY CHAMPIONS

Wattbike isn't just the choice of elite road and track cyclists. World and olympic champions across all sports use Wattbike to train smarter, push harder and improve performance.

WATTBIKE PRO / TRAINER

Indoor trainers engineered to enhance the performance of everyone, whether you're a complete beginner or elite athlete.

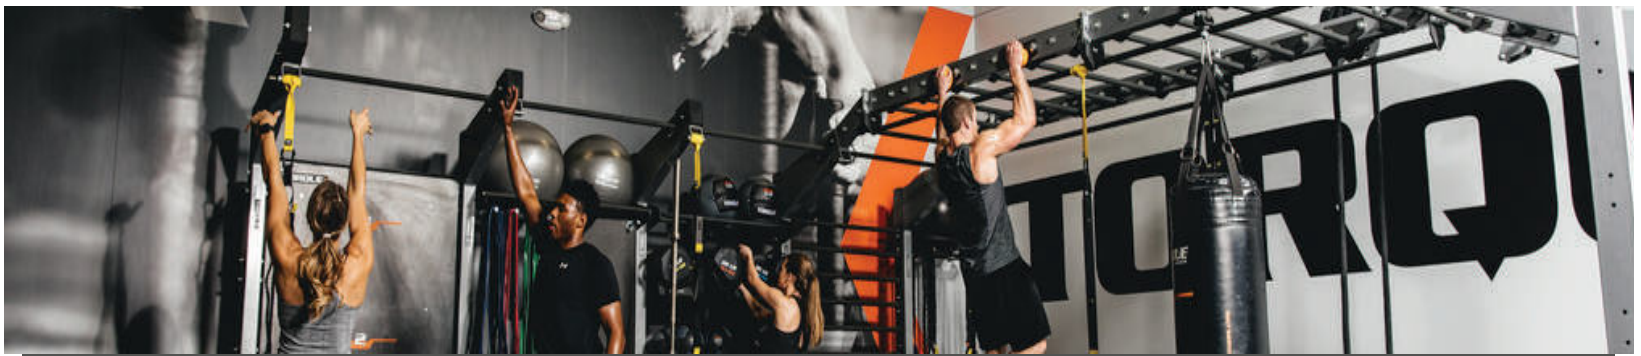

WATTBIKE ATOM X

The most advanced commercial smart bike. With groundbreaking design and cutting edge technology, the Wattbike AtomX smart bike boasts our feature-filled high-definition touchscreen for a range of workouts and challenges, and integrated digital shifters for the most realistic ride.

WATTBIKE ATOM

Wattbike Atom is the smartest indoor bike trainer. Bar none. So when it comes to improving your cycling performance, nothing comes close to this smart bike.

TORQUE FITNESS **DON'T QUIT**

THE EVOLUTION OF FUNCTIONAL FITNESS

TANK – All Surface Sled

TANK is the ultimate tool in building an explosive athlete. Build speed, increase explosive power, and enhance acceleration using all three levels of Torque's Mag-Force Resistance™. Endless training possibilities await with this innovative fitness sled.

X-SELECT

Combining the Functional Storage of our X-Create gym line with our Cable Technology, X-Select bridges the gap between functional and traditional fitness. Add a Lat Pull-down, Seated Row, or Cable Component station to any X-Create storage solution to build the perfect multi-station gym.

X-RACK

X-Racks are hardcore systems meant for both Functional and Olympic lifting. X-Racks can be used as a cost-effective solution for suspension training, a replacement for Olympic Benches, a small group training system with a variety of stations, or anything you can dream up.

X-CREATE – Your Ultimate Training & Storage System

Create the ultimate training space. The x-create by torque fitness takes the features of a perfected storage system and merges it with endless training possibilities. X-create is fully customizable to fit all of your facility and functional fitness needs.

Climbing!

Light mountain climbing, trekking along a ridge, and rock climbing using the muscles of the whole body are different activities. We researched treading with the lower body and even the delicate movements of the upper body and back muscles. We design our products so that you can enjoy even the effects of climbing over rough and rigid rocks.

DRAX

Designed by Science

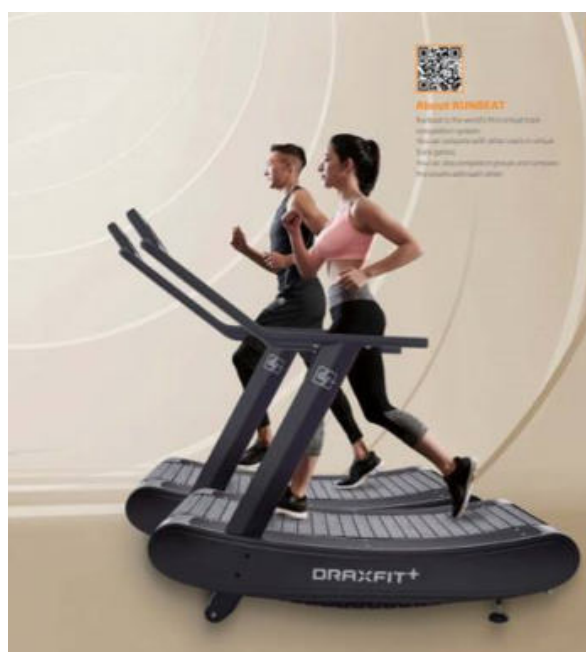

SYNERGY

FITNESS

Overview:

- ▶ Patented integrated continuous variable transmission
- ▶ Potential power range of up to one million watts at 150 steps cycle per minute
- ▶ Automatic range of movement variability up to 65cm
- ▶ Multiple operational modes, including but not limited to: Total body climbing, Lower body climbing / stepping (supported and unsupported), Upper body reciprocal and/or single arm "hang pull" and "push press", Lower body reciprocal and/or one arm supported chest press and row, Reciprocal calf press, Deadlift and pushdown

NON-MOTORIZED TREADMILL

Features & Benefits

Curved Design

Curved design with higher front and rear roller and lower center position makes it so when the user takes bigger steps the speed increases, with smaller steps the speed decreases, and when the user stands on the center, the treadmill slows to a stop.

Slat Belt Design

Unlike a conventional treadmill, it uses thick and strong caterpillar type slats. There is no running board under the belt, therefore there are no concerns for shock to the human body while running.

Running On Nature

When the user take steps on the curve, it stimulates the body to start putting pressure into the big toe first, imitating the stimulation of running outside. Over 20- 30% more efficiency guaranteed.

Bluetooth Communication (Optional)

Through Bluetooth communication (BLE4.0) and by DRAX designed smartphone APP, you can display all kinds of exercise information on your smartphone or LCD monitor. You can even manage exercise information with IoT technology.

TKO®

STRENGTH & PERFORMANCE

EVERY DAY IS AN OPPORTUNITY

Founded in 1996, TKO Strength & Performance started out as a boxing equipment company, and has since evolved into a health & fitness equipment company that offers a variety of products ranging from dumbbells to functional trainers.

Highly Versatile Space - Efficient Modular

The Corner

The Corner provides space-constrained facilities with the functionality of a much larger structure, but in a space-efficient configuration that works well in a corner today, or can be easily expanded on or reconfigured in the future.

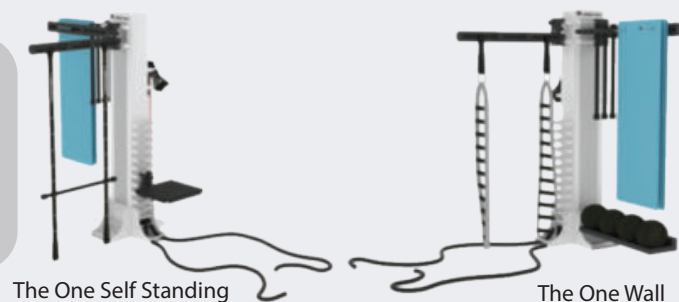

W475 2D Wall Solution

Enhanced with a broad range of training accessories and storage solutions, the Wall Solutions are ideal for facilities looking to dedicate a higher level of organisation to functional training, while taking advantage of space that's often underutilised: the space along the walls.

THE ONE

The One is a single station, wall-oriented or self-standing unit ideal for 1:1 personal training. It can be easily augmented with storage and additional training accessories as needs increase.

The One Self Standing

The One Wall

The Format X2 Fixed 450

As a free-standing system that can accommodate functional and suspended bodyweight training accessories, The Format configurations will be the hub of personal training activity that's bound to attract and engage.

TOTAL™ STRETCH

A SUPERIOR STRETCHING EXPERIENCE ALL ON ONE MACHINE!

DESIGNED for the heavy-duty commercial facility market, the TotalStretch™ TS200 revolutionizes stretching by allowing users to safely and effectively perform a comprehensive set of stretches all in one place. Seated or standing. From the front or the back.

FEATURES

ErgoStretch™ HANDLEBAR SYSTEM

Provides multiple grips to target different muscles for users of all sizes. Places the foot in a bio-mechanically correct angle to ensure an effective hamstring stretch. Ensures correct foot position and stability for numerous standing stretches.

ErgoStretch™ PLATFORM

Places user in correct position for more effective lower leg stretches. Allows users of all sizes to perform standing stretches from a stabilized position.

ErgoStretch™ ROLLERS

Provides comfortable and effective leg stabilization for both seated and standing stretches.

SEAT / LEG PAD

Provides comfort and stability for correct positioning in seated stretches.

PLACARD

Instructs the user through a comprehensive 10-stretch total body circuit.

THE HUB300

EPIFLEX RUBBER FLOORING

EPI Sports provides a broad range of Rubber floorings. EPIFLEX is made of a mixture of recycled rubber (SBR) and coloured new rubber granules (EPDM). These are bonded together with a polyurethane binder.

Although every combination of recycled rubber (0-100%) and coloured EPDM granules (0-100%) can be provided, some standard series have been defined. These series have a fixed proportion of recycled rubber versus new rubber.

EPIFLEX20-80 SERIES:	20% Coloured EPDM granules and 80% Recycled Rubber
EPIFLEX EXTREME & SENSATION:	With 20-35% big(extreme) and small (sensation) EPDM dots
EPIFLEXMIX SERIES:	Between 60-100% Coloured EPDM
EPIFLEXUNI SERIES:	100% EPDM

UNIQUE FEATURES

- Impact sound absorbing
- Excellent anti-slip characteristics even when wet
- Extremely wear resistant
- anti-fatigue

EPI FITNESS TILES

EPI Fitness Tiles protect substrates from damage by heavy falling objects. These tiles are especially designed for weightlifting areas of fitness centers or training facilities.

EPI Fitness Tiles avoid deep impact damage while providing outstanding sound deadening as well and ensure that areas around the gym remain quiet.

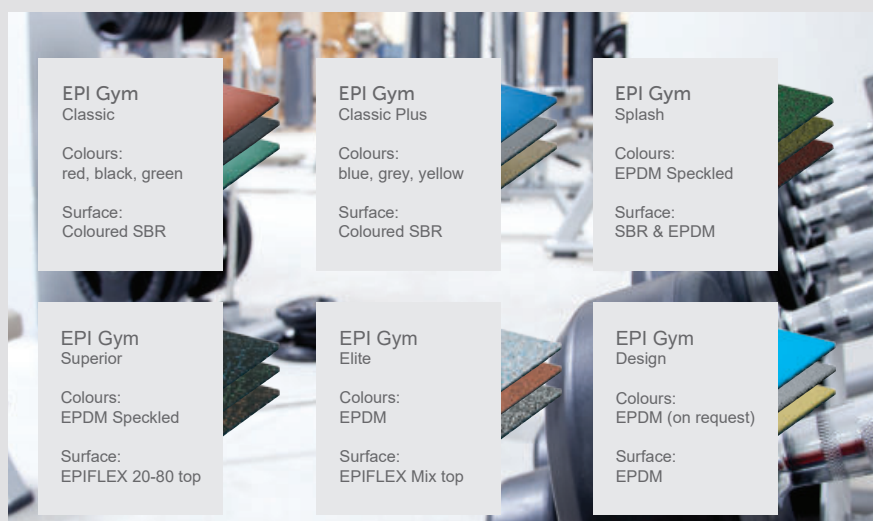

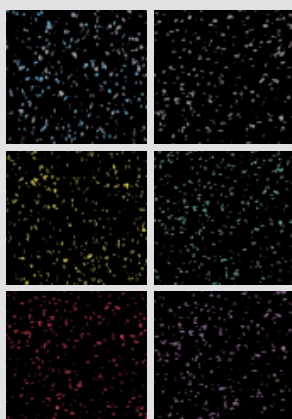

EPI Fitness Tiles can be used in:

- Fitness rooms
- Heavy weight areas
- Healthclubs
- Physical therapeutic areas

Zebra is the World's Leading MMA Training & Competition Mat

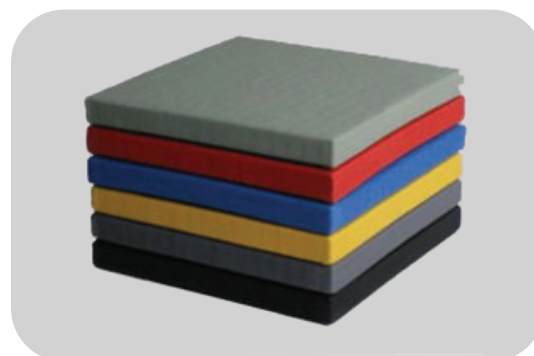

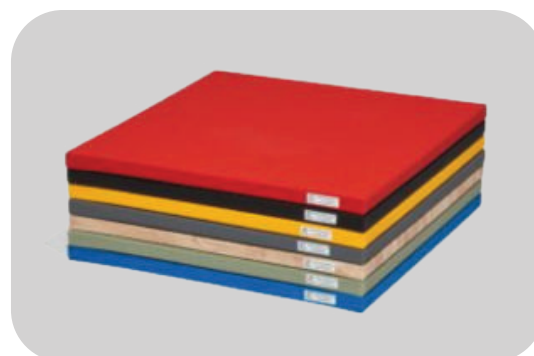

Specifically developed for stand-up martial arts and fitness training, the 1 inch thick Zebra Mat is one of our best-selling products. At 1 inch thick, each mat provides a firm surface for kicks and spins, enough shock absorption for the occasional fall or takedown, and is a proven solution for fitness training.

Regardless of thickness, the center of every Zebra Mat is a 100% recycled, multi-density, open-cell foam held together with a proprietary adhesive process that allows us to confidently offer a 15-year product life expectancy alongside the Zebra Mats 10-year warranty.

Because the foam is open-cell, it is also completely climate stable – meaning your mats will not expand or contract with changes in temperature, additionally they reduce noise pollution, and act as an insulator which can reduce utility costs.

On the exterior, every Zebra Mat is surfaced and edged with a reinforced, closed-cell vinyl that is internationally certified as phthalate free, and has received an antimicrobial treatment to help prevent the growth of microorganisms. The corners are hand-finished to ensure a moisture-proof seam at each, and the underside is completed by a natural rubber anti-skid surface for added stability.

OSSTSPORT
ComPact-Fleck

Comfortable, durable, tough are the main characteristics of ComPact flooring with Fleck surface. This product is specially designed for fitness areas and skate resistance(*High hardness version) to provide wear resistant and sound absorption during exercising.

THICKNESS 6,8,10_{mm}	ROLL WIDTH 100~125_{cm}	ROLL LENGTH 6~15_m

HiTec High Performance Sled Tracks

Sled work involves pushing and pulling a weighted sled over a set distance. The training surface is extremely resistant to wear and provides exercisers with good grip underfoot. A sled lane surface is a feature within a gym and the design is easily customized by cutting in lines, numbers, letters and even a company logo. For plyometric activities the sled lane can be bonded to a high performing shock pad. Materials suitable for this type of activity include:

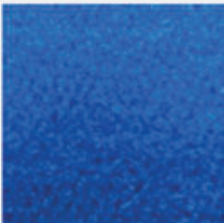

- Needle-punched polypropylene sports surface available in a range of bright colours
- Elastic layers for additional shock absorbing properties
- Customised lines, numbers and letters
